Introduction

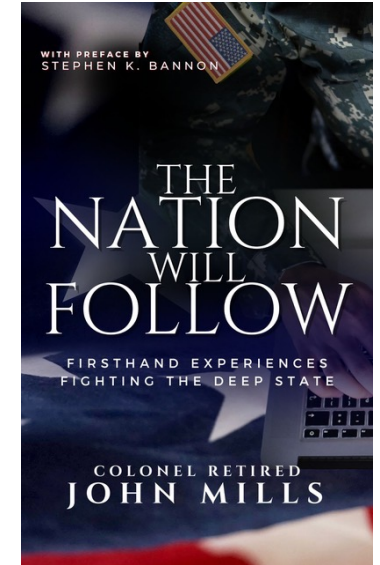

Conversation in the “A” Ring

- A chance encounter with a Bush “W” Appointee right before the 2016 RNC Convention?
- Who are you going to support at the Convention? Trump – right?
- “No – we see more opportunities with her”
- Who is we and what opportunities do you see?

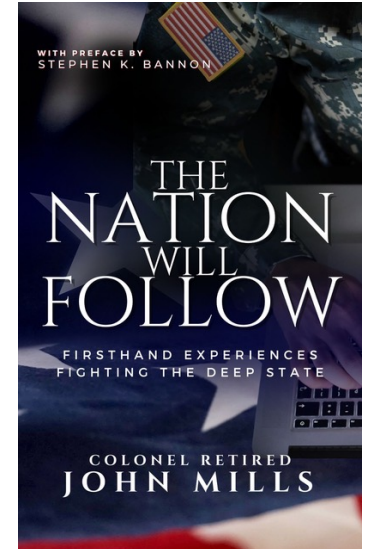

A Dinner in London

- On a flight to London 30 days before the 2016 election – several I recognize on the flight including coincidentally a retired very senior Federal Law Enforcement Official. A close personal friend of James Comey
- We're at a private dinner on October 6, 2016, and coincidentally the retired official is there also
- His introduction about himself – “We're going to prove Trump is a Russian Asset!” Everyone is astonished
- Only reason he could have in London – to coordinate Crossfire Hurricane with CIA Chief of Station, Gina H.

Blocking the First Inauguration

- A call on the Top-Secret Phone
- "John, we need you to participate on the inter-agency committee standing up" with an Intelligence Community Assessment (ICA)
- We're going to finalize the Trump is a Russian Asset story and delay or block Trump's inauguration.
- "John, No need to get Ash Carter's signature on the ICA. He's already signed and concurred. Comey and Brennan are personally, hands on keyboard typing the ICA."
- There was no information in the ICA conclusively confirming that Trump was a Russian asset (But it looks like retired FBI Senior Official Charles McGonigal was)

Former Prince William County General Registrar Indicted by Grand Jury

RICHMOND, VA – Attorney General Jason Miyares today announced that the Grand Jury for the 31st Judicial Circuit empaneled at Manassas indicted former Prince William County General Registrar Michele White on two felony charges and one misdemeanor charge. The charges are as follows;

- Between August 1st and December 31st, 2020: Corrupt conduct as an election official (Va. Code sec. 24.2-1001.B).
- Between November 3rd and November 10th, 2020: False statement by an election official (Va. Code sec. 24.2-1016).
- Between August 1st and December 31st, 2020: Willful neglect of duty as an election official (Va. Code sec. 24.2-1001.A).

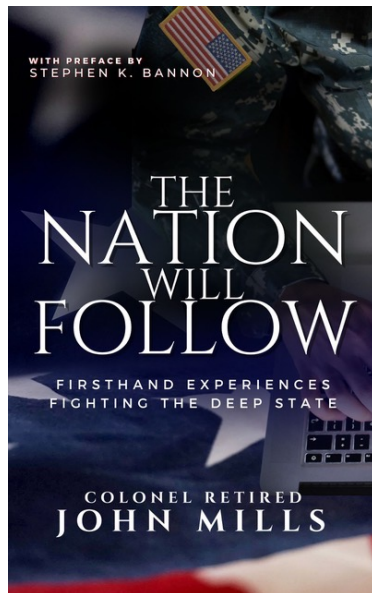

The Office of the Attorney General has no further comment as these cases are open and ongoing.

###

PWC, VA Highlights

- **One Registrar under indictment**
- **Current one possibly leaving**
- **Two GOP Chairs gone**
- **Much improved equity on Precinct Chairs/Vice Chairs**

BREAKING GOOD NEWS :
If you recall, during this past session , my election integrity team met with Virginia Attorney General Jason Miyares to discuss various irregularities, discrepancies and down right corruption that occurred in the 2020 Presidential Election.

Now the results of that information we passed onto the OAG have led to an official indictment of a former Virginia election official in Prince William County and the creation of an Election Integrity Unit within the OAG. At our meeting with the OAG, we quickly learned they didn't have the resources needed to conduct such an investigation and I introduced a number of floor amendments to provide additional funding.

Ultimately, the OAG received the money and are now able to create this unit. This is a huge win for my Election Integrity Team, for We the People and for fair, transparent and honest elections. Definitely a step in the right direction.

A huge shout out to Col John Mills!

ATTORNEY GENERAL MIYARES ANNOUNCES NEW ELECTION INTEGRITY UNIT

RICHMOND, VA - Attorney General Jason Miyares today announced the creation of the Election Integrity Unit at the Office of the Attorney General. This Unit will provide legal advice to the Department of Elections, investigate and prosecute violations of Virginia election law, work with the election community throughout the year to ensure uniformity and legality in application of election laws, and work with law enforcement to ensure legality and purity in elections.

The purpose of the Unit is to provide advice, support, and resources to ensure that Virginia election law continues to be applied in a uniform manner, and increase confidence in our state elections.

"I pledged during the 2021 campaign to work to increase transparency and strengthen confidence in our state elections. It should be easy to vote, and hard to cheat. The Election Integrity Unit will work to help to restore confidence in our democratic process in the Commonwealth," said Attorney General Miyares.

Virginia has a system of elections that divides authority among 133 local electoral boards and general registrars and the bipartisan State Board of Elections. The new Election Integrity Unit will work with the State Board, the Department of Elections and the dedicated, hard-working local election officials in the upcoming election and beyond. The Unit is made up of more than 20 attorneys and investigators/paralegals from across the various divisions in Office of the Attorney General.

Under Virginia law, the Attorney General has broad original jurisdiction in the area of elections. Specifically, the law states

PRINCE WILLIAM COUNTY VA
BY [Signature]

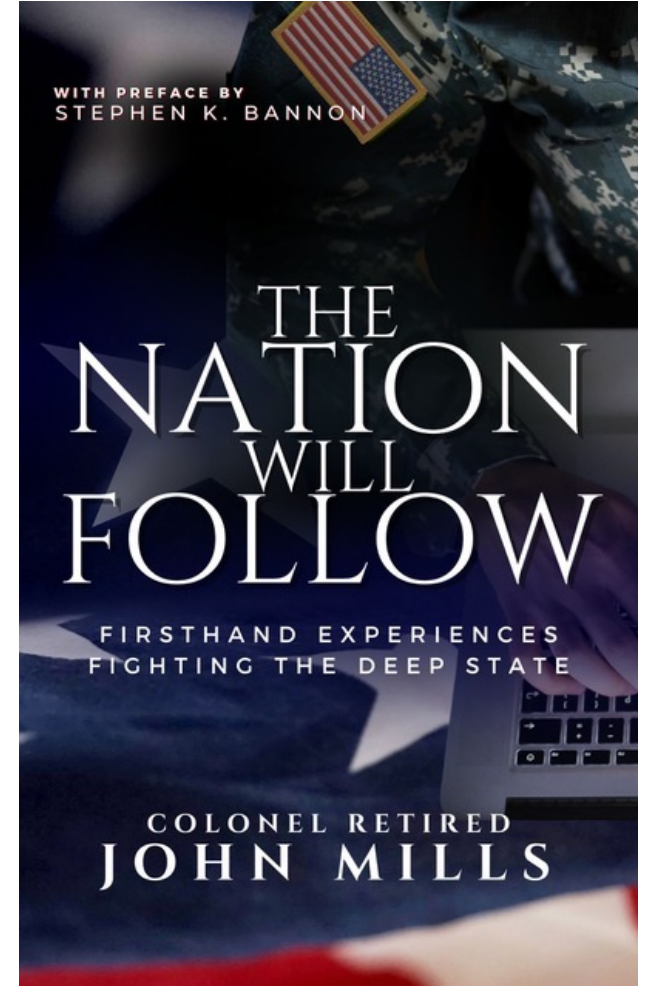

Your petitioner, John R. Mills, represents as follows:

1. Enjoin the certification of the Prince William County Vote from the November 8, 2022 election for at least 48 hours to conduct the following:
2. Court directs the by-hand recount of the number of ballots and the marks on the ballot for Precinct 612 due to reported differences in the same information vis a vis the tapes generated by the tabulating machines,
3. Court directs Precinct 511 to conduct the same as reasonable, statistical due diligence, to provide confidence in sampling
4. Court directs the General Registrar to explain why the new Electronic Poll Books were not user ready the morning of election, why operators were directed to install encryption, connect to servers, and conduct other matters which would normally be considered higher level System Administrator functions, which they were not trained for. Furthermore, it is in the public interest to know where the data from the election was stored and processed if off the immediate site of the precinct and how the data was merged and shared for the amassing of cumulative results.

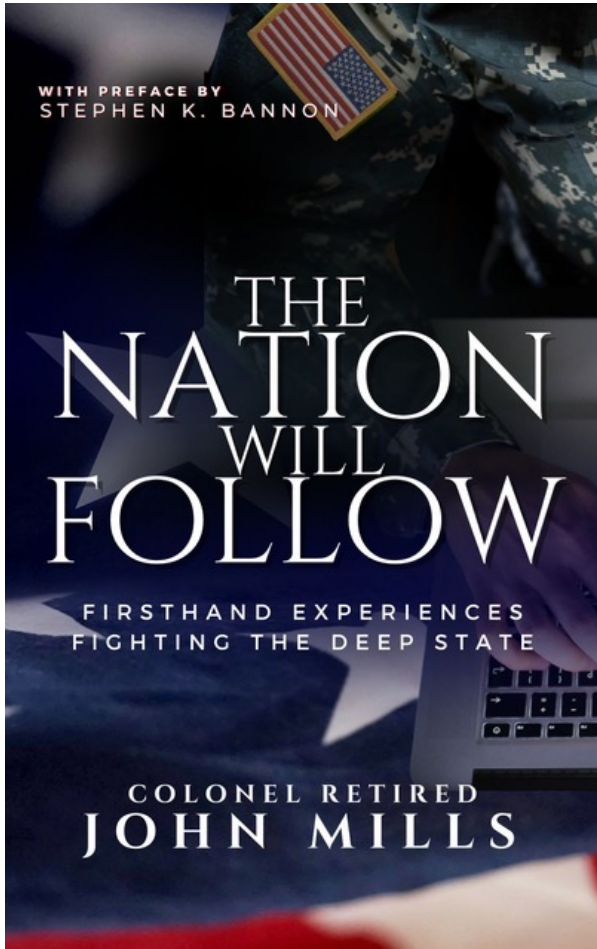

WHEREFORE, the petitioner prays for action and that to this end all necessary and proper orders be entered.

Best Practices County and State

-  State
-  County
-  Done
-  Progress

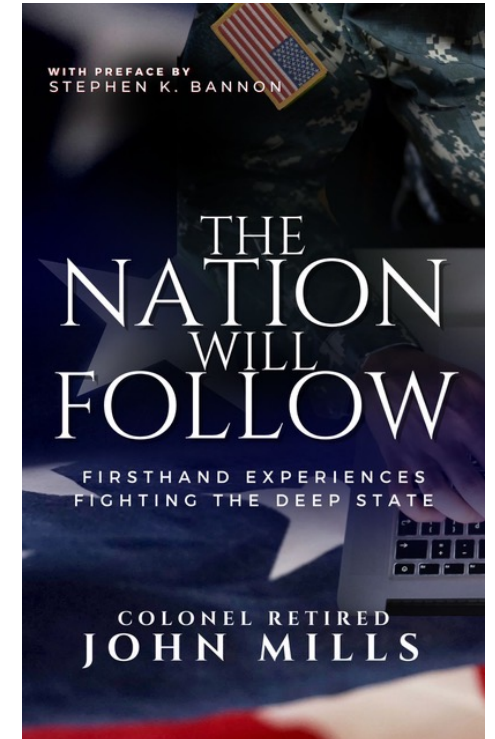

- 

1. Establish a Clean Voting Roll of existing voters: Inherent under § 24.2-114. Duties and powers of general registrar (sub-section 6) it is the duty of the Registrar to ensure Voters are lawful, which includes citizenship. In a 2019 FOIA of Prince William Court (31st District), 6% of the jurists were rejected due to three reasons that would make the ineligible to be on the voting roll. Under § 8.01-345 the primary source of jurists are the voting rolls.
- 

2. Demonstrate a trusted process for new voters registered via the DMV: The registrar, as the lead official for ensuring a clean roll should establish and publicly demonstrate a process for ensuring that voters registered through the Department of Motor Vehicles (DMV) are lawful voters. Currently there appears to be no reasonable check and balance to validate an individual who checks the first on a driver’s license application is a lawful voter.
- 

3. Implement demonstrative ability of the Election Board to provide guidance and perform its duties: Under § 24.2-106 – 109, Local Election Boards must pro-actively carry out their duties. With examples from Fairfax and Prince William Counties in 2020 and 2022, the Election Boards have been passive observers who have acquiesced to un-lawful guidance from registrars to disregard signature requirements on absentee ballots and hiring of Assistant Registrars. Election Boards must approve these actions and/or give approval first.
- 

4. Ensure Security and Integrity of Federally designated, Critical Infrastructure: Registrars must demonstrate the complete ability to independently (without the vendor) conduct complete inspections, tests, and oversight of the Federally designated, Critical Infrastructure (Election Machines, Tabulators, Poll Books, and related components) under their sworn oversight. There has been a Failure to exercise Articles 13 and 32 of the Hart Contract SBE-140324-HART Voting Machines, Equipment, which allows unfettered, complete access to the machines and a five-year retention of all artifacts related to the voting process. The Federal Election Assistance Commission provides no standards for other than what many call “election machines”. This means there are no security standards for tabulators, poll books, data storage, data processing, cloud computing, printers, or any other equipment or peripherals used in the election process. This process should include independent 3rd party audit, verification, and validation.

- 

5. Validate Security and Sovereignty of all election data: With the Konnech case in Michigan, it is an imperative duty of the vendor and the Registrar to validate all aspects of election data processing, storage, and networks to ensure all data and activity is conducted completely within sovereign U.S. territory.

- 

6. Make elections clean and clear of outside non-appropriated funds to “assist” or “facilitate” anything related to elections, voter registration or any activity: Any outside funds are poisonous and acidic to the lawful election process. The Facebook related CTCL is but one example. This funding is weaponized to advocate for causes and candidates and undermines the integrity of the election process for all. In 2020, under the guise of the Virus, State laws and counties were manipulated, and citizens were misled by the true extent, nature, and purpose of these outside funds. If we are to say we are inclusive in Virginia – this must never happen again.

§ 24.2-124.1

- 

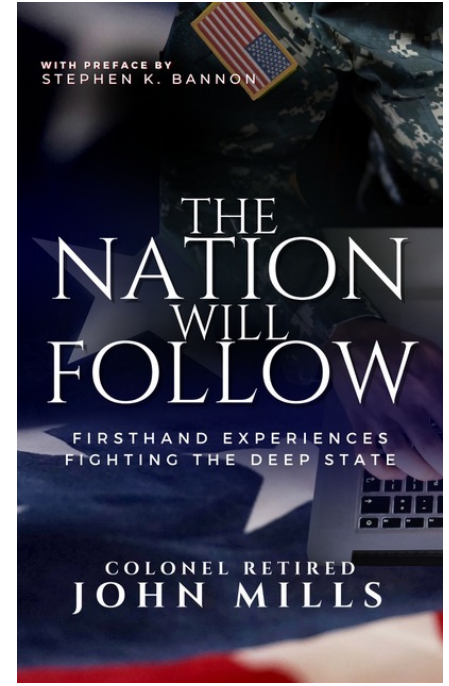

7. Separate from the ERIC system: There is no federal legal requirement to participate in the ERIC system for voter registration (ericstates.org). Although nice sounding, states have surrendered sovereignty of their voting roles to this non-profit. The Commonwealth of Virginia needs to stand on its own and be able to demonstrate their ability to manage their voting rolls. ERIC receives no independent, 3rd party audits or reviews and has become an unquestioned manager and uploader of voting data, often without the direct verification and validation of state and county officials. There is no demonstrated efficiency or accuracy from participation in the ERIC organization.

- 

8. Establish and use a Trusted Ballot: In the most sacred of processes to our democratic republic, the voting process, the counties of the Commonwealth of Virginia do not have standards or control measures to define or ascertain the validity of absentee ballots. This is shocking, ballots should be valued and protected, just like our currency. Modern currency has numerous counter-counterfeiting measures built in, it is quite inexpensive and implementable to do the same with ballots. To not do this is a direct affront to the sensibilities of the lawful voter.

-  State
-  County
-  Done
-  Progress

Best Practices County and State

9. Move to Paper only with Trusted Ballots: In the 2022 election, Prince William County demonstrated that paper re-counts were quick, efficient, and accurate. The overly complex electronic systems that are now in effect have no independent verification and validation of the scope, scale, and connectivity of their environment. Countries such as France, Germany, Canada, and Taiwan are paper only voting countries, this can be done in America.

10. Create a new audit system and process: The nice sounding “Risk Limit Audits” that are currently used in Virginia have little legitimacy in respect to any environment that must generate a legal audit of finances or activities of business or government operations. A more reasonable and realist process that uses at least a four percent sample (or complete precincts within a county) are more accurate and will generate better confidence of a broader cross section of society than the questionable methodology of the existing “Risk Limit Audit” model.

At the State Government level, an additional finding and observation is the need for a State Inspector General Office on the model of the Federal Government. Currently, the State has little ability, capacity, or capability to conduct audits, reviews, and investigations in elections or across any aspect of State or County Government. At the size, scope, and scale of the Commonwealth of Virginia, it is time for establishment of a modern Inspector General like model for state government and county government. It is simply the right and reasonable thing to ensure confidence in governance by the citizens of Virginia
